FOR IMMEDIATE RELEASE:

Headline: TalkingParents Revamps Security and Sign Up for Users

Byline: Co-parents can now sign up via mobile app using improved process

Fort Walton Beach, FL: TalkingParents co-parenting communication service has released an update to their service that streamlines and increases security throughout the sign-up process for new TalkingParents customers.

In a continued effort to improve the security of TalkingParents and in response to customer feedback, the team at TalkingParents has completely overhauled the new customer sign-up process. This upgrade includes the option for co-parents to sign up and create an account entirely through the mobile app, making it easier for co-parents to connect and begin communicating accountably. The team focused on implementing added protection and monitoring technologies, which will ensure that new accounts are both credible and accurate.

This major update to the customer sign-up process comes just a few months after the TalkingParents release of Accountable CallingSM. This unique calling feature enables co-parents to place secure calls through the TalkingParents app within the United States and Canada.

TalkingParents' full list of features, include Accountable CallingSM, Secure Messaging, Shared Calendar, File Vault, Attachment Library, and the Personal Journal. TalkingParents aims to help co-parents avoid and resolve disputes by creating accurate and unalterable Records of all their interactions. Customers can order Calling, Messaging, and Calendar Records as digital PDF downloads or certified printed hard copies.

ABOUT TALKINGPARENTS

TalkingParents is the only co-parenting service to offer Accountable CallingSM. Through their free website and paid mobile apps, TalkingParents improves accountability and communication between co-parents.

TalkingParents helps co-parents avoid disputes and focus on the most important people in their lives—their children. TalkingParents has been mentioned in TechCrunch, Romper, Fast Company, Fatherly, and Us Magazine Online.
